WRT to my part in the mission the only activity I saw was on S50's side of the HLZ. When his PSR(R)1 lads landed to check out the building immediately to the North of the LZ. I saw three pers exit the building on the Western side and headed North through the trees (Pers were unarmed and one of the pers was possibly a minor), this activity was reported on the Ops channel. The only other activity witnessed was the MAM coming and going on S50's side as described in S50's statement.
